GIS Presentation

GIS Analyst Catherine Cronlund presented information on a mobile home location program that she developed. She stated the program will identify where homes are located currently and what areas of the County future mobile homes could be located. She explained this program is extremely helpful to the Code Enforcement and Tax Assessor's Departments as well as other offices.

Ms. Cronlund stated this is multi-use data that can be utilized to any extent for whatever data is available and has unlimited uses. Various types of properties can be identified such as commercial, residential, and governmental.

She reported she is in the process of developing a system for on-line work orders where issues can be reported without citizens having to call or come to the office to report a problem. Ms. Cronlund stated this is a way to engage the public.

Commissioners commended Ms. Cronlund on her efforts to develop the program and for her informative presentation. They expressed their appreciation to her for a job well done.
