BETWEEN  
CITY OF MILLEDGEVILLE, GEORGIA  
AND  
BALDWIN COUNTY, GEORGIA  
REGARDING WATER AND SEWER SERVICE  
WITHIN UNINCORPORATED BALDWIN COUNTY**

THIS AGREEMENT, is made this 6 day of February, 2020 by the CITY OF MILLEDGEVILLE, a Georgia municipal corporation wholly situated within Baldwin County, Georgia (hereinafter, the "City") and BALDWIN COUNTY, a political subdivision of the State of Georgia (hereinafter, the "County"; collectively, the City and County shall be referred to as the "parties").

IN CONSIDERATION OF THE COVENANTS AND MUTUAL PROMISES HEREIN MADE AND OTHER CONSIDERATION RECEIVED, THE RECEIPT AND SUFFICIENCY OF WHICH IS HEREBY ACKNOWLEDGED, THE PARTIES AGREE TO BE BOUND, EACH TO THE OTHER, AS FOLLOWS:

1.

LEGAL AUTHORITY: This writing (hereafter referred to as "the Agreement" or "IGA") shall constitute a binding, legal contract by and between the parties hereto, in accordance with the authority granted by Article IX, Section III, Paragraph I of the 1983 Constitution of the State of Georgia. Each of the parties herein covenants that it has the requisite legal authority to provide the services, perform the functions, construct,

operate and maintain the facilities and equipment, and otherwise do all things necessary, ancillary and convenient, to carry out the obligations and responsibilities herein set forth, either expressly or by reasonable implication. Said parties further covenant that all conditions precedent or actions required by law to authorize said agreement have been taken or performed in proper form. This agreement shall constitute a valid, binding and enforceable obligation of each party. The parties covenant that they will uphold and defend the validity and enforceability of this agreement in any proceeding in which it may be contested or challenged by a third party.

2.

PURPOSE AND INTENT: The purpose of this Agreement is to evidence the parties' mutual agreement as to future service delivery for potable water distribution and sanitary sewage collection, treatment and disposal to customers located in unincorporated Baldwin County lying outside of the present City of Milledgeville. The material terms hereof have been negotiated during mandatory Service Delivery Strategy mediation in 2019 and early 2020. The City has agreed to sell and convey to the County a portion of its current service area north of the present City along the shores of Lake Sinclair, consisting of water distribution lines, sanitary sewage collection lines, and related infrastructure required for the County to provide water distribution and sewer collection to customers in the unincorporated County; provided, for the term of this Agreement the County shall purchase not less than 11.0 million gallons per month (mpm) of treated drinking water from the City, on a "take or pay" basis, and the City will provide sanitary sewage treatment and disposal for the County on the terms and

conditions hereinafter set out. This Agreement supersedes the current sewer contract between the parties, effective as of its date of commencement as set forth below.

3.

TERM: This Agreement shall commence at 12:01 a.m. on February 7, 2020 and terminate at Midnight on February 6, 2040, unless terminated sooner by mutual agreement of the parties. The parties covenant that this Agreement is in their mutual best interest and should govern the parties as to its subject matter for its full term, unless both parties, by a majority vote, agree to future modification, which would best mutually serve both parties' future delivery strategy for retail Water Service and Sewer Service to customers located in unincorporated Baldwin County; provided however this provision shall not apply in the event of a material breach which is uncured after following the procedures of Paragraph 10.

F. *City Service Area.* "City Service Area" shall mean the incorporated area of Baldwin County, Georgia as well as the water and sewer lines in the unincorporated area as shown in Exhibit "A" attached hereto and collectively referred to as the City Service Area.

5.

CITY TRANSFERS & COUNTY PAYMENT:

A. *Transition.* The City and County agree to a transition and phase-in period for the transfer of the Water and Sewer Transfer Territory, as shown on Exhibit "C". The transition period will be for 365 consecutive days beginning on the Effective Date (hereinafter "Transition Period"). During each 3-month quarter of the Transition Period, the County shall pay for and take over from the City, a minimum of 25% of the Water and Sewer Transfer Territory. (The percentage shall be based on the total number of billing accounts within the Water and Sewer Transfer Territory. All customers and accounts with present and future service located within the addresses listed in Exhibit D shall be included in the transition and no transition period will commence or occur until a definitive number of accounts is determined and agreed upon by both the City and the County.) The County has sole discretion in the selection of which portion of the Water and Sewer Transfer Territory it will take over during each 3-month quarter. In the event the County decides to take over more than 25% of the Water and Sewer Transfer Territory during one of the first three quarters, the County will take over the remaining Water and Sewer Transfer Territory during the fourth quarter. (For instance, if the County takes over 33% of the Water and Sewer Transfer Territory during the first quarter and 25% in both the second and third quarters, the County would take

over the remaining 17% in the fourth quarter.) The entire purchase and transfer of the Water and Sewer Transfer Territory shall be completed on or before the last date of the Transition Period. At the end of each 3-month quarter during the Transition Period, the total number of customers and their respective accounts transferred from the City to the County will be identified and the total water consumption of those customers will be applied to the minimum of 11 million gallons of water per month the County is required hereunder to purchase from the City as described in Paragraph 6 below.

B. *Service.* During the Transition Period, the City shall continue to provide Water Service and Sewer Service to the rate payers located in the Water & Sewer Transfer Territory until these customers are transferred to the County Water and Sewer System. Upon the transfer of customers and accounts in the Water and Sewer Transfer Territory, the County shall provide Water Service and Sewer Service to the applicable rate payers. Following the Transition Period, the City shall provide Water Service and Sewer Service in the City Service Area, and the County shall provide Water Services and Sewer Service in the County Service Area. The City shall provide Water Service and Sewer Service to the County as provided for in Paragraph 6 of this Agreement. This agreement shall serve as an effective repeal of any service area agreements previously entered into or agreed to by the parties.

C. *Water and Sewer Asset Transfer and Payment.* By execution of this Agreement, the City agrees to transfer to the County by quitclaim deed and bills of sale, and the County agrees to accept, any and all interest the City has in the accounts, assets, control, customers, equipment, infrastructure and land interests in the Water and Sewer Transfer Territory. Said transfer in the Water and Sewer Transfer Territory shall take place during the Transition Period, as described above. Prior to County's payment

discussed below, the City agrees to approve and sign any document necessary to effectuate this transfer of that portion of the City Water and Sewer System in the Water and Sewer Transfer Territory. In exchange for said transfer, the County shall pay to the City a total of \$4.25 million within one year from the execution of this Agreement. The County will use general obligation bond funds backed by the County's share of SPLOST proceeds to fund the \$4.25 million transfer price. The purchase price shall be paid in four quarterly installments during the Transition Period based upon the percentage of the Water and Sewer Transfer Territory transferred to the County. (For example, if the City transfers to the County 25% of the Water and Sewer Transfer Territory during the first quarter of the Transition Period, then the County will pay to the City \$1,062,500.00 on or before the last workday of first quarter of the Transition Period.)

D. The City grants to the County the express right to tap on to and install meters on the City Water and Sewer System in order to service the County Water and Sewer System customers. To service the County Water and Sewer System customers, the City consents to the County installing water or sewer lines alongside the City's existing water or sewer lines located on Log Cabin Road, Sinclair Dam Road, and PA Johns Road; in the unincorporated areas of the City's Service Area; the City consents and waives any objection to the County doing so.

6.

CITY AND COUNTY PAYMENTS / RATES:

A. *Water Purchase and Rates.* The County shall purchase Water Service from the City at the rate of \$1.60 per thousand gallons of water (inclusive of any and all fees or other charges) subject to increases as provided for herein. The City shall not charge additional fees or charges to the County for Water Service. Both retail and wholesale

water rates (inclusive of all fees and charges) imposed on the County and the City's unincorporated area customers by the City shall not increase by more than the same percentage as the rates (inclusive of all fees and charges) are increased by the City to its incorporated area water customers. (For instance, if the City raises said rates by 10% on incorporated area customers, then the City may only raise the rates it charges to the County and/or the City's unincorporated area customers by a maximum of 10%). At least thirty (30) days prior to the effective date of any such increase, the City shall provide to the County written notice of any such increase. The City agrees to provide Water Service to the County through master meters installed by the City and County at locations jointly determined by the parties for connection of the City Water System to the County Water System. The City and County shall share equally in the cost of these meters, their installation, and periodic calibration.

B. *Water Purchase.* During each month of the one-year Transition Period described in Paragraph 5 above, the County shall purchase a percentage of 11 million gallons of water per month (hereafter abbreviated as "MGM") which corresponds to the percentage of the customers transferred from the City to the County in the Water and Sewer Transfer Territory. (For instance, if at six months into the Transition Period, the County has taken over half of the Water and Sewer Transfer Territory, the County shall purchase at least 5.5 million gallons per month thereafter.) At the end of the Transition Period, if the County has paid the City for less than the full 11.0 million gallons of water per month, the County shall remit to the City the monetary difference between what was purchased and what is owed by no later than the forty-fifth (45<sup>th</sup>) day following the end of the Transition Period. Following the Transition Period and for the duration of this Agreement, the County shall purchase no less than 11 million gallons of water per month

from the City. If following the Transition Period, the County purchases less than 11 million gallons of water per month from the City, then the County shall remit to the City the monetary difference between what was actually purchased and what is owed, within fifteen (15) days of the close of the following month. If, based on master meter readings for the prior month, actual monthly consumption exceeds 11.0 million gallons per month, payment shall be based on the current wholesale rate per thousand gallons times actual monthly volume of water consumed and following the same remittance schedule.

C. *Sewer Rates.*

i. *County Sewer Rates.* The City shall provide Sewer Service to the County at the wholesale rate of \$4.14 per thousand gallons (inclusive of any and all fees) through the end of 2020. Beginning in 2021, the rate will be \$4.50 per one thousand gallons (inclusive of any and all fees). For each five-year period thereafter, the City shall increase said wholesale sewer rate at a maximum of 5% per each five-year period inclusive of the first year of this Agreement. At least thirty (30) days prior to the effective date of any such increase, the City shall provide to the County written notice of any such increase. Nothing herein should be construed to prevent the City from increasing its sewer rates on exclusively the sewer ratepayers within the incorporated area of the City.

ii. Retail sewer rates (inclusive of all fees and charges) imposed on the City's unincorporated area customers by the City shall not increase by more than the same percentage as the rates (inclusive of all fees and charges) are increased by the City to its incorporated area sewer customers. (For instance, if the City raises said rates by 10% on incorporated area customers, then the City may only raise the rates it charges to the City's unincorporated area customers by a maximum of 10%).

iii. Sewer Service charges shall be based on the water consumption of those customers in the County Service Area that are also connected to the County Sewer System and follow the same remittance schedule as used in the Water Purchase section.

(D) *County Special Limited Obligation.* The County agrees that its obligation to pay for Water Service and Sewer Service to be provided to retail customers within the County Service Area, as shown on Exhibit "B", constitute special, limited obligations of the County which, pursuant to O.C.G.A. §36-70-24, shall be borne by the unincorporated area residents, individuals, and property owners who receive the services from the County. Payments to the City may be generated from any of the revenue sources from the County's unincorporated special district, including taxes, as defined in DCA Form 2's agreed upon by the City and County in the Service Delivery Strategy.

7.

OPERATION AND COVENANT NOT TO COMPETE: As provided above, the City retains the right to own and operate its existing water lines in the rights-of-way of Log Cabin Road and Sinclair Dam Road, and sanitary sewer mains in road rights-of-way or easements adjacent thereto, with the right to repair, replace and extend such water lines and sewer mains; provided, however, during the term of this Agreement, the City covenants not to compete against the County for retail water or sewer customers outside the City Service Area as depicted on Exhibit "A". The County, to serve customers located within the County Service Area depicted on Exhibit "B" shall have the right to tap into City water lines between the master meters that will be installed on Log Cabin Road as

well as on the delivery side of master meters installed on North Jefferson Street, PA Johns Road, and on service lines for The Club at Lake Sinclair, and Legacy at Lake Sinclair

and to install water meters within the right-of-way of Log Cabin Road, and/or to install its own water lines within the right-of-way of Log Cabin Road.

System and the County Water and Sewer System shall not be operated as an integral system and that each party shall be separately permitted; provided, however, if required by law or regulations, all connections between the County Water and Sewer System and City Water and Sewer System, existing or future, shall be designed by a professional engineer, licensed and in good standing in the State of Georgia, subject to approval by Georgia EPD to the extent required by law. Construction shall be performed only by Georgia-licensed utility contractors. All sewer users connected onto the County Water and Sewer System shall be metered for water usage and the County shall maintain the meters in good working order.

As a wholesale purchaser of water from the City and in order to discharge sewage to the City's treatment plants, the County will promulgate and enforce all environmental and operational regulations pertaining to operation of the County Water and Sewer System, including restrictions on illicit discharges to its sewer collection system, cross-connections to its drinking water system, and drought management policies. The County agrees to notify the City, as far in advance as possible, of any new water user locating within the County, whose estimated consumption is 100,000 gallons or more per day. The parties agree to work cooperatively in the interest of and protection of their customers and the environment at all times.

the dispute not be resolved to the parties' satisfaction by this process, the parties agree, before filing a lawsuit, to first submit the dispute to mediation with the parties sharing the costs of the mediator and any related costs. The mediator's findings and conclusions shall be non-binding on the parties.
